

Arquitectura de las computadoras

1er cuatrimestre – 2015

Trabajo Práctico Especial: Manual de usuario.

Integrantes:

- Braulio Séspedes - Legajo 51074
- Daniel Lobo - Legajo 51171
- Mauricio Minestrelli - Legajo 52015

Fecha de entrega: 10/06/2015

Lista de comandos:

- help
- echo
- prtc
- srtc
- sstest
- sstime

Comando Help

Lista los comandos disponibles.

A screenshot of a QEMU terminal window. The title bar at the top says 'QEMU' and has standard window control buttons (minimize, maximize, close). The terminal content shows a red prompt 'root@ArquiOS>' followed by the command 'help'. The output lists six commands with their descriptions: 'help' (print this message), 'echo' (prints the arguments to stdout), 'prtc' (print time), 'srtc' (set time), 'sstest' (display screensaver), and 'ssstime' (set screensaver timer). The prompt 'root@ArquiOS>' is shown again at the bottom.

```
QEMU
root@ArquiOS>help
help      print this message
echo      prints the arguments to stdout
prtc      print time
srtc      set time
sstest    display screensaver
ssstime   set screensaver timer
root@ArquiOS>
```

Comando Echo

Imprime los argumentos por la salida estándar.

```
QEMU
root@ArquiOS>help
help          print this message
echo          prints the arguments to stdout
prtc          print time
srtc          set time
sctest        display screensaver
sstime        set screensaver timer
root@ArquiOS>echo Darth Vader
Darth Vader
root@ArquiOS>
```

Comando prtc

Imprimir en pantalla la hora actual.

```
QEMU
root@ArquiOS>help
help          print this message
echo          prints the arguments to stdout
prtc          print time
srtc          set time
sctest        display screensaver
sstime        set screensaver timer
root@ArquiOS>sstime 0
New trigger time must be greater than 0
root@ArquiOS>sstime
New trigger time must be greater than 0
root@ArquiOS>sstime 55
root@ArquiOS>srtc 10
Incorrect clock format: srtc H M $S
root@ArquiOS>srtc 10 34 13
root@ArquiOS>prtc
10:34:17
root@ArquiOS>prtc
10:34:22
root@ArquiOS>
```

Comando srtc

Permite setear la hora del rtc.

Comando sctest:

Muestra el protector de pantalla.

Comando sstime:

Permite setear el timer del screensaver.
